PROFILE

Full Stack Software Engineer specialized in building scalable web applications and SaaS platforms using, Vue.js, Node.js, and Python. Experienced in database design. Passionate about applying AI/LLM technologies to real-world business challenges.

EDUCATION

Undergraduate Applied Studies - Information Technology, School of Computing (RAF), Belgrade
September 2023 — Present
Expected graduation: June 2026.

Savremena Gimnazija Cambridge Program, Belgrade
September 2017 — June 2021
Completed secondary education at Savremena Gimnazija, Cambridge International Program, with a curriculum taught fully in English and focused on critical thinking, global perspective, and academic excellence

PROJECTS

Lawcrative - Legal Software for Lawyers in the Balkans
January 2025 — Present
Co-founder & Engineer of Lawcrative, a SaaS startup for law firms in the Balkans, with modules for case/client management, calendar, integrated chat, and AI legal assistant. Built with Vue.js (frontend) and Node.js/Python (backend, FastAPI), integrating OpenAI & LangChain for document automation and legal insights.

[Stefanedelman.dev](#) - Personal Portfolio
November 2025
Designed and developed a static portfolio site to showcase technical projects.
Built using Vue.js for component-based architecture and optimized for SEO.
Configured custom DNS and SSL via Namecheap and Vercel to ensure 99.9% uptime and secure browsing.
